

# Home Learning Ideas

## Autumn 2

For our new History learning journey, we will be exploring the lives and work of Florence Nightingale and Mary Seacole. In Art we will be learning about still life Picasso and how to mix different colours. In Science, we will be investigating Animals (including humans), looking specifically at how to keep healthy. Home Learning is encouraged so that your child can share with you some of the knowledge and skills learnt in school as well as allow them to learn more and follow their own areas of interest. It can also help your child to become more involved in the learning and become more independent with their thinking. If you would like some ideas please use the list below, but these are merely suggestions, and it would be great to see what the children think of themselves. We can't wait to see what the children produce this half term...

### Home Learning Ideas

- Can you create a painting in the style of Picasso? Remember to use bright colours.
- Plan a dance routine, using counts of 8. Think about what your dance routine could represent, for example, a dance about your favourite hobby, a dance that represents the weather or a dance that represents a place such as the jungle or the desert.
- Do some research about Florence Nightingale, Mary Seacole and nurses. Create an information booklet or leaflet.
- Design a poster encouraging other people to stay healthy.
- Design a healthy meal on a paper plate. Use the Eatwell plate to help you plan for a balanced diet.
- Make a healthy snack. Remember to ask an adult to help you with using cutting and cooking tools.
- Think about all the different things we need to stay healthy and happy.
