

English

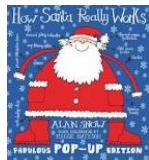

The focus for our reading and writing this half term will be based around winter themed

texts. We will explore a range of beautiful texts to collect high-quality description. We will also learn how to use fronted adverbials to add additional information and interest to our writing as well as how to engage the reader by using speech. We will learn how writers use techniques to develop suspense and practise these in our own chapters.

Later on in the term, we will look at explanation texts, exploring a book called 'How Santa Really Works'. The children will go on to produce their own explanation text about how they believe Santa's sleigh works.

P.E This half term is Hockey and Dance.

The children will need the following P.E. kit in school every day:

Coloured P.E. T-shirt

Black shorts

Trainers

Tracksuit bottoms and jumper

Spare socks—As we are out in all weather, please do provide your child with spare socks in case they need a change.

Home Learning will support the learning from the school week and will be stuck in children's books on a **Friday morning**. Home learning will then be due in on the following **Wednesday**. Dates will be clearly labelled on the homework sheet.

Please do ensure we have all books in on a **Wednesday** so we can ensure your child has everything they need for the following week.

Reading continues to be an important part of your child's development in Year 4. Please encourage your child to read a little each day at home and ask them about what they have read. Please record three entries in your reading record a week. One signature can acknowledge them all.

Spellings for the week will be recorded in your child's spelling log. Please revise the weeks spelling rule as well as remembering to look over previous rules. Try not to learn just the words your child has recorded in their log, research new examples to check and see if they do understand the rule they have learnt. Can they apply it in sentences? Red words are also stuck in spelling logs, please continue to practise these at home and regularly review sets of words to support your child in learning these confidently.

Timetables Rockstars!

Use your Rockstars login to practise your tables. **Sound Check** is a great way to practise a mini quiz style assessment so you can see how you are getting on.

Year 4 Curriculum Information Leaflet Autumn 2

Year 4 Team

Mrs Hay, Mrs Dawson, Mrs Hunt & Mrs Loder

Dates for your diary:

Friday 3rd November School Disco

Tues 14th & Thurs 16th November Parents Evening

Thursday 16th November Lockyers Workshop am

Friday 17th November Children in Need

Thursday 23rd November Y4 Book Look

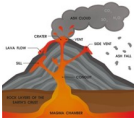

Thursday 30th November Christmas Panto in school

Wednesday 6th December Christmas Performance
(Evening)

Thursday 7th December Christmas Performance
(Morning)

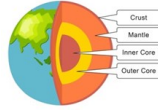

Friday 8th December Christmas Jumper Day

Thursday 14th December Party Day

Geography Mountains and Volcanoes

We will begin our geography learning by revising the make-up of planet Earth, looking at the crust and how it is made up of tectonic plates. We will use this knowledge to understand how mountains are formed and discuss the key features of mountains. Finally, towards the end of the half term, we will learn about volcanoes, exploring the different types of volcano and researching and gathering information together.

RE Throughout our RE sessions we will be exploring the key question 'What is the Trinity?' We will learn and discuss that Christians believe Jesus is one of the three persons of the Trinity: God the Father, God the Son and God the Holy Spirit.

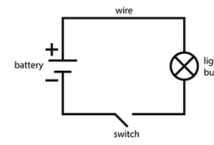

Music During our music sessions this half term we will be exploring a wide range of different music including genres such as Pop, Folk and Jazz. We will be exploring a key question 'How does music connect us with our past?'

DT

In our D.T. learning we will explore electric circuits.

We begin identifying battery powered objects and learn about the features, components, materials and functions of a range of battery powered products. We will investigate switches and make a simple circuit with batteries and a range of different types of switches, bulbs and buzzers. We conclude our learning with designing a product with a circuit.

Science

This term we will be learning that things are made from particles and how we can change the state of a material. We will focus on water and the changes made with heating and cooling as well as the processes of condensing and evaporating. The water cycle will be recapped from Year 3 and we will

discover the work of Anders Celsius and Daniel Fahrenheit.

Jigsaw PSHE

This term we will 'Celebrate Difference'. We consider influences that can affect how we judge a person or situation. We discuss cyber bullying and what to do if we think bullying is taking place.

Maths

This term we will be learning about multiplication and division. We will learn that multiplication is commutative and division is not. We will also learn about the distributive law and apply our knowledge to two part word problems. We will then learn about x10, x100 along with division with remainders. We will finish our term, learning about hundredths. Throughout this term we will continue to have our weekly times table learning, with a focus on x7 and x11 in whole class learning sessions.

French

The French unit is titled 'Je Me Presente'. This unit revises all core language learnt in Year 3 and ensures children are able to take part and contribute in a conversation discussing their name, age

Computing Journey Inside a Computer

We will explore the role of computer parts and create paper versions of computers to help us consolidate our understanding of how a computer works. We will identify similarities and differences between various models.
